OSPF Routing Algorithm Report

CS14B023, Rahul Kejriwal

Topology-1:

1. The network topology is

All Links are bidirectional i,j on link is minC_{ij}, maxC_{ij}

- 2. Routing Tables:
 - a. For Node 0:

```
Routing Table for Node No. 0 at Time 40
Dest Path
                Cost
0
     0
                 0
1
     0-1
                 2
                 3
2
     0-2
3
     0-2-3
                 6
                 7
     0-7-5-4
4
5
                 5
     0-7-5
6
     0-6
                 6
7
     0-7
                 3
                 7
8
     0-7-8
9
     0-2-9
```

b. For Node 1:

```
Routing Table for Node No. 1 at Time 40
Dest Path
                Cost
0
     1-0
                2
1
     1
                0
2
     1-2
                3
3
     1-3
                4
4
     1-3-4
                6
5
     1-0-7-5
                6
6
     1-0-6
                4
7
     1-0-7
                4
8
     1-0-7-8
                8
9
     1-2-9
                6
```

c. For Node 2:

```
Routing Table for Node No. 2 at Time 40
Dest Path
                Cost
0
     2-0
                1
                3
1
     2-1
2
     2
                0
3
     2-3
                3
4
     2-4
                2
5
     2-4-5
                4
                3
     2-0-6
6
7
     2-0-7
                3
8
                7
     2-0-7-8
9
     2-9
                4
```

d. For Node 3:

```
Routing Table for Node No. 3 at Time 40
Dest Path
                Cost
0
     3-1-0
                4
                2
     3-1
1
2
                3
     3-2
3
     3
                0
4
     3-4
                2
5
     3-5
                4
6
     3-4-6
                6
7
     3-1-0-7
8
     3-1-0-7-8 10
9
     3-9
                4
```

e. For Node 4:

```
Routing Table for Node No. 4 at Time 40
                Cost
Dest Path
0
     4-6-0
                9
     4-3-1
                7
1
2
     4-3-2
                6
3
     4-3
                3
4
     4
                0
5
     4-5
                3
6
     4-6
                4
7
                7
     4-6-7
                9
8
     4-6-8
9
     4-3-9
```

f. For Node 5:

```
Routing Table for Node No. 5 at Time 40
Dest Path
                Cost
0
     5-6-0
                8
     5-6-7-1
                7
1
2
     5-4-2
                7
3
     5-4-3
                4
4
     5-4
                2
5
     5
                0
6
                3
     5-6
7
     5-6-7
                6
8
     5-6-8
                8
9
     5-4-3-9
                7
```

g. For Node 6:

```
Routing Table for Node No. 6 at Time 40
Dest Path
                Cost
0
     6-0
                2
     6-7-1
                3
1
2
     6-0-2
                3
3
     6-0-2-3
                5
4
     6-5-4
                6
5
     6-5
                3
6
                0
     6
7
                2
     6-7
8
     6-8
                4
9
     6-0-2-9
                5
```

h. For Node 7:

```
Routing Table for Node No. 7 at Time 40
Dest Path
                Cost
0
     7-0
                3
1
     7-0-1
                6
2
     7-0-2
                4
3
     7-5-3
                4
4
     7-5-4
                5
5
     7-5
                2
6
     7-6
                2
7
     7
                0
8
     7-8
                4
9
     7-0-2-9
                6
```

i. For Node 8:

```
Routing Table for Node No. 8 at Time 40
Dest Path
                Cost
0
     8-7-0
                5
     8-7-0-1
1
                8
2
     8-7-0-2
                6
3
                7
     8-6-5-3
4
     8-6-5-4
                8
5
     8-6-5
                5
                3
6
     8-6
7
     8-7
                3
8
     8
                0
9
     8-7-0-2-9 8
```

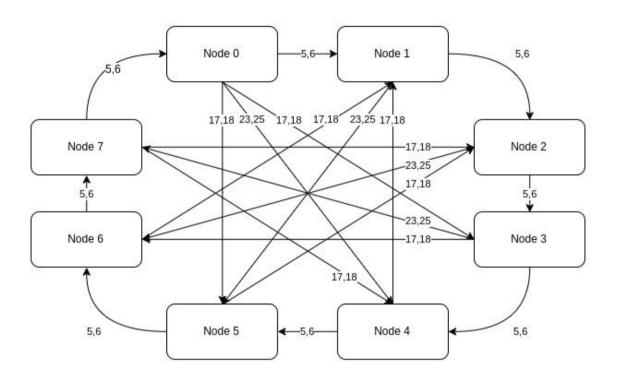

j. For Node 9:

```
Routing Table for Node No. 9 at Time 40
Dest Path
                Cost
0
     9-2-1-0
                7
     9-2-1
                5
1
2
     9-2
                3
                2
3
     9-3
4
     9-3-4
                5
5
     9-3-5
                5
6
     9-3-5-6
                8
7
     9-3-5-7
                8
     9-3-5-7-8 11
8
     9
9
                0
```

Topology-2

1. The network topology is

All Links are bidirectional i,j on link is minC_{ij}, maxC_{ij}

2. Routing Tables:

a. For Node 0:

```
Routing Table for Node No. 0 at Time 40
Dest Path
                Cost
     0
                0
0
     0-1
1
                6
2
     0-1-2
                12
3
     0-3
                18
4
     0-4
                23
5
     0-5
                18
     0-7-6
                12
6
7
     0-7
```

b. For Node 1:

```
Routing Table for Node No. 1 at Time 40
Dest Path
                Cost
     1-0
0
                6
1
     1
                0
2
     1-2
                6
3
                11
     1-2-3
4
     1-2-3-4
                17
5
     1-0-7-6-5 21
6
     1-0-7-6
                16
7
     1-0-7
                11
```

c. For Node 2:

```
Routing Table for Node No. 2 at Time 40
Dest Path
                Cost
     2-1-0
                10
0
     2-1
1
                5
2
     2
                0
3
     2-3
                6
4
     2-3-4
                12
5
     2-3-4-5
                17
     2-1-0-7-6 20
6
     2-1-0-7
                15
```

d. For Node 3:

```
Routing Table for Node No. 3 at Time 40
Dest Path
                Cost
     3-2-1-0
                17
     3-2-1
                12
1
2
     3-2
                6
3
     3
                0
4
     3-4
                6
5
     3-4-5
                11
6
     3-6
                17
     3-6-7
                22
```

e. For Node 4:

```
Routing Table for Node No. 4 at Time 40
Dest Path Cost
0 4-3-2-1-0 22
1 4-3-2-1 17
2 4-3-2 11
```

```
3 4-3 6
4 4 0
5 4-5 6
6 4-5-6 12
7 4-7 17
```

f. For Node 5:

```
Routing Table for Node No. 5 at Time 40
Dest Path
                Cost
     5-6-7-0
                16
     5-4-3-2-1 21
1
2
     5-4-3-2
                15
3
     5-4-3
                10
4
     5-4
                5
5
     5
                0
6
                5
     5-6
7
     5-6-7
                10
```

g. For Node 6:

```
Routing Table for Node No. 6 at Time 40
Dest Path
                Cost
0
     6-7-0
                11
     6-7-0-1
1
                16
2
     6-5-4-3-2 21
3
     6-5-4-3
                16
4
     6-5-4
                11
5
     6-5
                6
6
     6
                0
7
                5
     6-7
```

h. For Node 7:

```
Routing Table for Node No. 7 at Time 40
Dest Path
                Cost
0
     7-0
                6
     7-0-1
                11
1
2
     7-2
                17
3
     7-4-3
                22
     7-4
4
                17
5
     7-6-5
                12
6
     7-6
                6
7
     7
                0
```
